PLANBOTNIA AB

Oceans are a global force of nature that form **the foundation of the blue planet** on which we live. They cover **71%** of our planet's surface and make up **95%** of all the space available to life. They are a **life-support system for Earth** and a global commons that provide us with free goods and services, from the food we eat to the oxygen we breathe.

The oceans also **regulate the global climate**; they mediate temperature and drive the weather, determining rainfall, droughts, and floods. They are also the **world's largest store of carbon**, where an estimated **83%** of the global carbon cycle is circulated through marine waters.

So what does the
MSP community
do about it?

PLANBOTNIA AB

What *can* we do?

Roll up our sleeves!
Listen to the science!
Get our toolbox out!
Make some waves!

How? Where to start? Make new tools?

We can do it!

#MSPforum

Thank you!
